How To Use Food Therapy For Healing Your Dog
- Food is the number one thing pet owners do for their pets.
- If the food isn't good, it doesn't matter what therapy, therapies won't work as well.
- Food therapy can help other therapies work better - acupuncture, Chinese herbs, chiropractic - all of them.
by Dr. Cathy Alinovi Retired Veterinarian

The Dangers Of Commercial Pet Food And Kibble:
- The pet food industry is a multibillion dollar industry that wants to sell something, and is not well regulated in terms of real clinical health responses to many pet foods.
- High heat processing of kibble pet food creates potent carcinogens in every bite of food, causing cancers (which are further fed by the high carbs in the same diets).
- Hidden Carbohydrates/sugars, poor quality and inappropriate ingredients in Pet foods are at the root of many common pet illnesses, decrease quality of life and lifespans of pets.
by Dr. Barbara Royal Integrative Vet, CEO of College of Integrativ Veterinary Therapies

Nutrition in Cancer
- Cancer cell metabolism
- Dietary modifications in cancer patients
- Cancer fighting/prevention foods
by Dr. Kendra Pope DVM, DACVIM (Oncology)

TCM And Macrobiotics For Feeding Pets To Help Prevent Illness
- Every food ingredient has an Energetic effect upon the body's metabolic processes.
by Dr. Ihor Basko DVM, CVA

The Raw Dog Food Truth
- Why raw feeding is safe?
- Why raw feeding is important?
- Why raw feeding is best?
by DeDe Murcer Moffett CEO of Raw Dog Food And Company

What Is A Biologically Appropriate Raw Food Diet And Why You Should Feed It To Your Dog
- That a Biologically Appropriate RAW Food Diet for any SPECIES is
- ITS EVOLUTIONARY PROGRAM OF NUTRITION
and that it is different for each species.
- That THE FORMULATION of a Biologically Appropriate RAW Food Diet is NOT BASED ON NUTRIENTS
it is based on Food — making it very simple to produce.
- That a Biologically Appropriate RAW Food Diet does not require balance at every meal, but rather, is best balanced over a series of meals.
by Dr. Ian Billinghurst Veterinary Surgeon

Why Vets Don't Like Raw Feeding
- Debunking common myths around raw feeding.
- Feeding bones safely.
- Food Safety and Balanced Diets.
by Dr. Katie Woodley Owner/Holistic Veterinarian

Is A Vegan Diet Good For Pets
- Vegan diets are totally inappropriate for dogs.

Sandra Hoogendoorn-Willemse profile

- It is impossible to create a natural, healthy vegan diet for dogs. - Ultra-processed food is not good for any living creature, including dogs and humans. by Dr. Nick Thompson MRCVS, Vet, Food Freak Grain-Free Vs. Grain Foods For Pets - The ongoing controversy - are foods containing grains essential for pets? - Is feeding grains harmful for pets? - Is feeding grain-free foods beneficial or harmful for pets? by Dr. Jean Dodds Veterinarian Nutraceuticals: The Benefits of Supplements - What Nutraceutical Additions to use in maximizing our dog's health? - The combination ingredients: Product that offer multiple benef - The importance of Green-Lipped Mussels and Deer Velvet Antl supplements. by Dr. Judy Morgan integrative veterinarian, acupuncturist, chiropractor, food therapist, author, and speaker
